

All roads lead to SAP S/4HANA

Seidor Westrocon Let'S/4 Travel

SAP[®] Qualified

Partner-Packaged Solution

Before 2025, all companies will have to migrate from SAP ECC to SAP S/4HANA. The destination is the SAP intelligent ERP solution, based on the HANA in-memory platform, which helps companies to improve their performance and evolve to adapt to a constantly changing environment.

How will you get there?

There is no set route to SAP S/4HANA; so Seidor Westrocon adapts to your needs and journeys with you, the whole way there. We help to prepare you from the initial assessment to the installation of SAP S/4HANA, with the option to include managed services and subsequent improvement and innovation projects.

If your system is up-to-date and ready for future innovation projects, then **conversion** is the way to go. This transformation is the most effective, as it minimises the impact on your business with a controlled cost and a shorter project time.

To help you reach your destination with as many guarantees as possible, we would recommend taking advantage of our **Seidor Let'S/4 Travel** SAP-qualified conversion package from the **Seidor S/4HANA Conversion Factory** team, who are fully committed to your project.
